Don,

I was able to read the file just fine - on this copy the Last name was on a separate line which looked funny. I just adjusted the left & right margins to 1.3 from 1.38 and the name looked much better. (This may just be on my copy) also (I thought that the Improvement Assoc. should get first billing - your choice)

Here are some additional names (are old time McKownville residents - not sure of the exact number of years - Added addresses where known, I'll get more addresses, but didn't want to hold off any longer:

Hi Jim

The following is the invitation--it is centered and sapced better and all of that that I do not know how to do for sure but I tried to attach the file and it might work.

I called Ken and left a message but no call back.

I need the names quickly. Bad news. My heart surgery is probably going to be scheduled for two weeks--like April 4--with a 45 day recuperation process so I have to get the invitations out soon to avoid shoving the work on someone else.

John Esler has a slide projector that can be used and so that is OK.
