

2006

Yearly Traffic Volume (Source: NYS DOT)

Year	Washington Avenue	Fuller Road	Comments
1988	11,753,000*		
1992	10,220,000*		The downward in traffic counts on Washington Avenue between 1988 and 1992 can be correlated to the expansion at Crossgates Mall and the ramp and road improvements that were made, notably the slip ramps off the I-87.
1994	9,928,000*		
1997	10,694,500*		
1999	12,032,590	4,708,500*	
2000	12,212,900	4,778,945	
2001	12,395,765	4,850,485*	
2002	12,581,550	4,923,485	
2003	12,770,255*	4,997,215	
2004	12,961,515	5,072,040	
2005			On May 23, 2005 a traffic count was performed by Creighton Manning Engineering for DOT during the 4-5 pm rush hour traffic at the Fuller Road Washington Avenue intersection experienced a traffic of 5148 vehicles. Of those vehicles, 596 used the southbound lane of Fuller Road and would thus pass to the Nanocomplex facilities <u>and</u> the UAlbany entrance <u>and</u> Freedom Quad. Note, that the study was conducted during peak rush hour traffic and is not a representative with the significantly smaller volume of hourly traffic..
2006	13,353,525	5,225,705	

* Indicates Actual Counts. All other counts are based upon DOT actual counts with a 1.5% growth
