To: Lisa Taylor, Freedom of Information Officer,  
University at Albany  
State University of New York

This is a request--a Freedom of Information request--to review the files concerning the rebuilding of the NanoTech pond located near Fuller Road.

The pond is on University land but it is being rebuilt by NanoTech, I believe.

I am president of the McKownville Improvement Association--a neighbor or the State University at Albany. I am also a retired professor (emeritus) of economics from the University, a former Faculty Grand Marshall for the University and a Collins Fellow at the University. My home phone is 489-3909 and my address is 5 Norwood Street, Albany, NY 12203.

The documents that I would like to have access to include----available inspection reports relating to the project; Notice of Intent concerning the Stormwater Pollution Prevention Report; and the Letter of Acknowledgement concerning the project. If there are additional documents that would shed light on what is going on--SPDES documents, for example, and Environmental Impact Declarations---those would also be appreciated.

The Association regrets that no notice about the project was forwarded to the neighborhood concerning the rebuilding project-----this has caused much anxiety by neighbors on Warren Street, Loughlin and those living on other nearby streets. So we now find ourselves trying to gain accurate information concerning the project and whether it is meeting the standards set forth in laws, rules and regulations.

As I understand the Freedom of Information laws, there should be no cost imposed on the Association for looking at the documents-----though reasonable charges may for imposed for obtaining copies of documents.

Since the neighbors are terribly upset by what is going on in the land near their backyards, I would appreciate it if these documents could be made available sooner rather than later.

Thank you.
