to kjohnson, Alice, Angie, Bill, David, Deborah, Doug, Ellen, Janet, Jim, Laura, M:

Hi Ken:

We had considered contacting Dr. Nichole Gialanella directly about our desire to have the property look more residential but we did not want to seem like we were harassing the buyers.

After studying the sketch you shared with us, if the building had more and larger windows and shutters at the windows, with ornamental windows at the peaks of the roofs, with window boxes and more plantings including bushes and trees that are more numerous and larger (greenspire linden's grow into stately trees as do red oaks and state street maples) and a steeper/taller roof line---then the building would look more residential--and that is what we would like to see. There are undoubtedly many other ways to accomplish this same end--that is, a more residential looking building---but that is the objective we desire to see achieved.

With a sketch of all four sides of the building in hand we might want to amend several of these suggestions.
